

Kiran Saju

ECE Student | Embedded Systems & AI/ML Enthusiast

Electronics and Communication Engineering student with an interest in embedded systems and AI/ML. Enjoy building projects involving both hardware and software, especially using ESP32 and sensors. Looking for opportunities to learn, contribute, and gain practical experience through internships.

PROJECTS

Gesture Recognition Glove using ESP32

- Tech: ESP32, Flex Sensors, Embedded C
- Built a wearable glove that detects finger movements using flex sensors.
- Used ESP32 to process gesture input and identify different hand movements.
- Explored sensor interfacing and real-time gesture recognition using embedded systems.

Life Clock – Life Expectancy Prediction Web App

- Tech: React.js, Tailwind CSS, Vite, Vercel
- Developed an interactive web application that estimates remaining lifespan using lifestyle and health-related inputs.
- Built real-time countdown visualization, personalized insights, and responsive UI features for improved user engagement.
- Worked with frontend development, deployment workflows, and Google AdSense integration using modern web technologies.

SKILLS

- Programming: Python, C, Embedded C
- Hardware: ESP32, Arduino, Sensors, IR Communication
- Software Tools: VS Code, Arduino IDE, Git
- Domains: Embedded Systems, IoT, AI/ML
- Soft Skills: Teamwork, Problem Solving, Communication

EDUCATION

B.Tech in Electronics and
Communication Engineering
MITS, Kochi
CGPA - 8.3
Expected Graduation: 2028

Class XII – Bhavans Munshi
Vidyashram
CBSE Board | 94%

ACHIEVEMENTS / ACTIVITIES

Mentor at TinkherHack 4.0
Member of IEEE Execom
